LASER TRAINING FOR SURGICAL STAFF

OPTION 1: IN-HOUSE LASER TRAINING

We come to you and can customize content for what you want, and can work with your own laser equipment with staff.

Typical programs are 1/2 day lecture and 1/2 day hands-on with your equipment. Abbreviated sessions are also available. These one day courses are \$1500 plus travel.

Some facilities may want to combine regular staff training with the 2 day medical laser safety officer training and certification. These two day courses are \$2500 plus travel.

More information on our website under the “In-House Training.”

v090831

OPTION 2: HOME-STUDY/ONLINE TRAINING

Three levels of training are available. Take the narrated lectures online and study the course manual and slide handouts that are electronically sent.

Basic Laser Safety Inservice—about 20 minutes in length as a general staff safety orientation for those not working directly with lasers. \$25 per person, or if you sign up for our Laser Safety Videoconference and need to cover others later, it's \$10 per person for the remainder of a year.

Surgical Laser Principles & Safety—about 4 hours in length, for those staff working directly with lasers or frequently in laser rooms. \$195 for one \$295 for two.

Medical Laser Safety Officer—8-12 hours in length for those assuming this position. Also available as a 2 day seminar. \$495 for one \$695 for two.

Website info under the “Online courses”

OPTION 3: VIDEOCONFERENCE

We hold quarterly Laser Safety Videoconferences for training of staff that are 4 hours in length and include breaks. These are live presentations and allow interaction and questions. It's the same lecture material as provided in the 1 day “In-House” courses, so if you have a senior tech or laser nurse that can do the hands-on training then you'll get the same quality of program as the In-House one at less than 1/2 the price.

\$795 and no limit on staff.

You just need a computer with a high speed internet connection and a projector for your audience. We use “Go-To-Meeting”.

Dates & details on website under the “Video-Conference Training.”
