

# Laser & IPL Hair Removal

Laser Safety Officers, Nurses, Physicians, Laser Operators, Cosmetic  
Laser Operators, Industry Representatives  
- Home-Study/Online Program -  
Accredited for 24 Nursing Contact Hours

**The Laser Training Institute™**

a training division of

**Professional Medical Education Association, Inc.**

*not-for-profit education, est. 1980*

**800-435-3131**

**COURSE DESCRIPTION:** This Home-Study/Online program is 186 pages and color illustrated. The Course Manual and Slide Handouts are in adobe .pdf format and designed to lay out all the knowledge necessary to enter this field and perform laser hair removal. The narrated online lectures follow the Slide Handouts. It includes laser biophysics and safety, an introduction to the types and differences in lasers and IPLs, and basic laser hair removal techniques and theory. Clinical video clips and the course manual will illustrate the procedures. The program is specifically oriented toward nurses, technicians, aestheticians and physicians with no background in this area. Physicians may use the certificate from this program as evidence of Laser Biophysics and Safety training, which is a prerequisite of most hospital laser credentialing requirements. The program is accredited for 24 contact hours for nurses. Aestheticians and Electrologists may use the Certificate of Training as evidence of required laser safety training when seeking employment in a medical office that offers these procedures, or in their own business in States that allow for use of lasers by non medical personnel. Those already engaged in Laser Hair Removal procedures may use the certificate as evidence of Laser Safety Training required by many insurance providers.

When you buy the 2+ individuals for \$595 you get the option of an additional 5 people at \$125 each at a later date.

*Contributions in content, illustrations and video by: Lumenis, ESC - Sharplan, Candela and Sciton.*
