## Aesthetic Laser & Light Based Procedures

---

### **In-House Laser Training & Certification**

Training, and separately Certifications, are available for your staff. This is perfect for training on used equipment. Please go to the websites for more specific information.

Laser Training—[www.LaserTraining.org](http://www.LaserTraining.org)

Laser Certification—[www.LaserCertification.org](http://www.LaserCertification.org)

Our non-profit organizations can provide academic and hands-on training on your Laser and IPL equipment with 1-3 day programs in your office. Teaching medical lasers since 1978.

The training programs include accredited Certificates of Laser Training with nursing credits assigned (and can qualify for Cat II CME). These programs can also include the NCLC Laser Certifications for the 3 day programs. This is a separate "Professional Credential" which establishes your credibility, and in some locations is used for licensing. NCLC Certifications are separate from the accredited "Certificates of Training".

1 Day—offered only to staff with evidence of previous laser training. Good for in-services on new equipment. (Push Button type training) \$1500 plus travel.

3 Day Aesthetic courses—complete academic and 1/2 day hands-on training, plus Certification exams. \$3500 plus travel. We can cut the office time to 2 days if they complete 5 lectures online prior to the course. We can cut the office time to 1 day of hands-on and NCLC testing if they complete ALL the lectures online in advance, and the price is then reduced to \$3000 plus travel. Up to 9 people.

Go to the [www.lasertraining.org](http://www.lasertraining.org) site, click on the "aesthetic" courses on the left, then scroll down and click on the "in-house" training programs. Don't forget to review the FAQ's section.

### **While you're in the FAQ's section, learn more about your laser program and training:**

- Questions about Aesthetic Laser Use—State licensing, training requirements. Laser Certification and Certificates of Laser Training.
- What you need to know about your Laser Safety Officer and Laser Safety Program.

### **Download and read the NCLC Laser Certification Handbook:**
